यसैबीच，यस कम्पनीको वार्षिक प्रतिवेदन २०२१／२२（२०७२／७ム） शेयरधनी महानुभावहरूको जानकारी एवं अवलोकनको लागि प्रकाशित गरिएको छ । यहाँहरूले प्रस्तुत सञ्चालक समितिको प्रतिवेदनबाट एक व्यापक दृष्टिकोण प्राप्त गरी कम्पनीको समग्र वित्तीय स्थितिको मूल्याङ़्न गर्नुहुनेछ भन्ने विश्वास मैले गरेको छु। यस कम्पनी सधैं यहाँहरूको साथमा रहिरहनेछ र यहाँहरूको लगानी सुरक्षित हुनेछ भन्ने भरोसा दिलाउन चाहन्छु । समीक्षा वर्षमा व्यवसाय सञ्चालन लगायत कम्पनीको कार्यसम्पादन सन्तोषजनक रहेको यस गरिमामय सभालाई जानकारी गराउन चाहन्छु ।

आज यस गरिमामय सभामा उपस्थित शेयरधनी महानुभावहरू समक्ष म कम्पनीको वित्तीय प्रतिवेदनको सारांश प्रस्तुत गर्न चाहन्छु। लाइफ इन्स्योरेन्स कर्पोरेशन（नेपाल）लिमिटेडले आर्थिक वर्ष २०७६／७६ मा १，०२，४૫७ बीमालेखहरू बिक्री गरेर प्रथम बीमाशुल्क आम्दानीको रूपमा ३ अर्ब ११ करोड ११ लाख संकलन गर्न सफल भएको छ। प्रथम बीमाशुल्क र बीमालेखहरूको सन्दर्भमा，अघिल्लो वर्षको तुलनामा क्रमशः १२．३४\％र ११．०४\％को नकारात्मक वृद्धि देखिएको छ । २०७६ को असार अन्त्यसम्म，कूल ६，६३，४ఒ६ बीमालेखहरू सक्रिय रहेका छन् । प्रतिकुल आर्थिक अवस्थाको बाबजुद पनि， हामीले आगामी दिनहरूमा कम्पनीको नयाँ व्यापार व्यवसाय वृद्धिको लागि थप प्रयास गरिरहेको यस गरिमामय सभालाई जानकारी गराउन चाहन्छौं ।

2. Basis of Preparation

The Financial Statements have been prepared in accordance with the Nepal Financial Reporting Standards (NFRS) issued by the Nepal Accounting Standards Board (ASB), as per the provisions of The Institute of Chartered Accountants of Nepal Act, 1997. These confirm, in material respect, to NFRS as issued by the Nepal Accounting Standards Board. The Financial Statements have been prepared on a going concern basis. The term NFRS, includes all the standards and the related interpretations which are consistently used.
(b) Basis of Measurement

The Financial Statements have been prepared on the historical cost basis except for following Assets \& Liabilities which have been measured at Fair Value amount:
i. Certain Financial Assets \& Liabilities which are required to be measured at fair value
ii. Defined Employee Benefits
iii. Insurance Contract Liabilities which are required to be determined using actuarial valuation for Liability Adequacy Test (LAT).
Historical cost is generally Fair Value of the consideration given in exchange for goods \& services.
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.
In addition, for Financial Reporting purposes, Fair Value measurements are categorized into Level 1, or 2, or 3 based on the degree to which the inputs to the Fair Value measurements are observable \& the significance of the inputs to the Fair Value measurement in its entirety, which are described as follows:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical Assets or

Liabilities that the entity can access at the measurement date;

- Level 2 - Inputs are inputs, other than quoted prices included within Level 1, that are observable for the Asset or Liability, either directly or indirectly; and
- Level 3 - Inputs are unobservable inputs for the Asset or Liability.
(c) Use of Estimates

The preparation of these Financial Statements in conformity with NFRS requires management to make estimates, judgements and assumptions. These estimates, judgments and assumptions affect the reported balances of Assets \& Liabilities, disclosures relating to Contingent Liabilities as at the date of the Financial Statements and the reported amounts of Income \& Expenses for the years presented. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Changes in estimates are reflected in the Financial Statements in the period in which changes are made and, if material, their effects are disclosed in the Notes to the financial statements.

Furthermore, Board is not aware of any material uncertainties that may cast significant doubt upon Company's ability to continue as a going concern and they do not intend either to liquidate or to cease operations of it.
(f) Changes in Accounting Policies

Accounting policies are the specific principles, bases, conventions, rules and practices applied by the Company in preparing and presenting financial statements. The Company is permitted to change an accounting policy only if the change is required by a standard or interpretation; or results in the Financial Statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the entity's financial position, financial performance, or cash flows.

(g) Recent Accounting Pronouncements

## Accounting standards issued and non-effective

Standards issued but not yet effective up to the date of issuance of the financial statements are set out below. The Insurer will adopt these standards when they become effective. Pending a detailed review, the financial impact is not reasonably estimable as at the date of publication of these financial statements.
i. NFRS 9 - Financial Instruments: Classification and Measurement
NFRS 9, as issued reflects the first phase of work on replacement of NAS 39 and applies to classification and measurement of financial assets and liabilities.

Since NFRS 9 consists of mixed sets of standards from IAS 39 and IFRS 9, this standard has been brought to the attention on issuing body and Institute of Chartered Accountants of Nepal. This is under review and will be effective after this has been resolved.

## ii. NAS 40 - Investment Properties

NAS 40 has been issued and made effective. However, the company has not applied the standard in view of no assets falling under this category.

Investment property is property (land or a building-or part of a building-or both) held (by the owner or by the lessee under a finance lease) to earn rentals or for capital appreciation or both, rather than for:
a. Use in the production or supply of goods or services or for administrative purposes; or
b. Sale in the ordinary course of business
(h) Carve-outs
i. Carves out relating to NAS 39 - Financial Instruments
Impracticability to determine transaction cost of all previous years which is part of effective cost rate
As per para 9, The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability.

When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received, unless it is immaterial or impracticable to determine reliably, between parties to the contract that are an integral part of the effective interest rate (see NAS 18

Revenue), transaction costs and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to estimate reliably the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).
The carve-out is optional and has been pronounced for the FY 2018-19 and 2019-20. Accordingly, the Company has opted the carve-out.
ii. Carves out relating to NAS 17- Lease

Operating lease in the financial statements of Lessees
As per para 33, Lease payments under an operating lease shall be recognised as an expense on a straight-line basis over the lease term unless either:
a. another systematic basis is more representative of the time pattern of the user's benefit even if the payments to the lessors are not on that basis; or
b. the payments to the lessor are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases. If payments to the lessor vary because of factors other than general inflation, then this condition is not met

The carve-out is optional and has been pronounced for the FY 2018-19, 2019-20 and 2020-21. Accordingly, the Company has opted the carve-out.

## 3. Significant Accounting Policies

This note provides a list of the significant policies adopted in the preparation of these Financial Statements.
a. Property, Plant and Equipment (PPE)

## i. Recognition

Freehold land is carried at historical cost and other items of property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation when, it is probable that future economic benefits associated with the item will flow to the Company and it can be used for more than one year and the cost can be measured reliably.
Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it meets the recognition criteria as mentioned above. The carrying amount of any component accounted for as a separate asset is derecognised when
$23^{\text {st }}$ ANNUAL REPORT 2078/79
Life Insurance Corporation (Nepal) Ctd.
replaced. All other repairs and maintenance are charged to statement of profit or loss during the reporting period in which they are incurred.
ii. Revaluation

The Insurance Company has not applied the revaluation model to any class of its PPE.

## iii. Depreciation

Depreciation on Property, Plant and Equipment other than Freehold Land i.e. the Company's Freehold Building, Plant \& Machinery, Vehicles \& Other Assets is provided on "Straight Line Method (SLM)" based on Useful Life estimated by technical expert of the management.
The Assets Useful Life/Rate of Depreciation and Residual Values are reviewed at the Reporting date and the effect of any changes in estimates are accounted for on a prospective basis.
Useful Life of Property, Plant and Equipment based on SLM is categorised as stated below:

| List of Asset Categories | "Useful Life <br> (In Years) for SLM" |
| :--- | :---: |
| Land | Not Applicable |
| Buildings | 20 Years |
| Leasehold Improvement | 10 Years |
| Furniture \& Fixtures | 15 Years |
| Computers and IT Equipments | 5 Years |
| Office Equipment | 7 Years |
| Office Equipment Telephone | 5 Years |
| Vehicles | 10 Years |

Note: Useful life/Rate of Depreciation are recommendary only. Insurer may adopt other alternatives as per their management estimate.
iv. Derecognition

An item of Property and Equipment is derecognized upon disposal or when no Future Economic Benefits are expected to arise from the continued use of the Asset. Any Gain or Loss arising on the disposal or retirement of an item of Property and Equipment is determined as the difference between the sales proceeds and the carrying amount of the Asset and is recognized in the Statement of Profit or Loss.
v. Impairment of Assets

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the Asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets. Assets that suffer
an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. In case of such reversal, the carrying amount of the asset is increased so as not to exceed the carrying amount that would have been determined had there been no impairment loss.
vi. Capital Work-In-Progress

These are expenses of capital nature directly incurred in the construction of buildings, major plant and machinery and system development which are to be capitalized. Capital Work in Progress would be transferred to the relevant asset when it is available for use. Capital Work in Progress is stated at cost less any accumulated impairment losses.
(b) Intangible Assets
i. Recognition

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in Statement of profit or loss in the year in which the expenditure is incurred.
Subsequent expenditure on intangible assets is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.
ii. Amortization

The useful lives of intangible assets are assessed to be either finite or indefinite. An intangible asset shall be regarded as having an indefinite useful life when, based on an analysis of all of the relevant factors, there is no foreseeable limit to the period over which the asset is expected generate net cash inflow for the entity.
Amortisation is recognised in statement of profit or loss on straight line method (SLM) over the estimated useful life of the intangible assets, from the date that it is available for use since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is
recognised in the statement of profit or loss.
Useful Life of Intangible Assets based on SLM is categorised as stated below:

| List of Asset Categories | "Useful Life <br> (In Years) for SLM" |
| :--- | :---: |
| Softwares | 5 Years |

iii. Derecognition

An Intangible Asset is derecognised when no Future Economic Benefits are expected to arise from the continued use of the Asset. Any Gain or Loss arising on the derecognition is determined as the difference between the sales proceeds and the carrying amount of the Asset and is recognized in the Statement of Profit or Loss.
iv. Impairment of Assets

The Company assesses at each reporting date as to whether there is any indication that Intangible Assets may be impaired. If any such indication exists, the recoverable amount of an asset is estimated to determine the extent of impairment, if any. An impairment loss is recognised in the Statement of Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets. Difference between amortized cost of staff loan and book value of Staff Loan at balance sheet date has not been recognised in Investment Income as Interest Concession element is equal to Staff Cost and gets reversed in the same year (NRs. 8.68 Lakhs).
(c) Investment Properties
i. Cost Model

Property that is held for rental income or for capital appreciation or both, is classified as investment property. Investment properties are measured initially at cost, including related transaction cost. It is subsequently carried at cost less accumulated depreciation. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred.
Land is carried at historical cost, however, buildings are depreciated over their estimated useful lives as mentioned above.
Investment properties are derecognised either when they have been disposed of, or when the investment property is permanently withdrawn
from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the statement of profit or loss in the year of retirement or disposal.
Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to PPE, the deemed cost for subsequent accounting is the fair value at the date of change in use. If PPE becomes an investment property, the Company accounts for such property in accordance with the policy stated under PPE up to the date of change in use.
(d) Cash \& Cash Equivalent

For the purpose of presentation in the Statement of Cash Flows, Cash \& Cash Equivalents includes Cash In Hand, Bank Balances and short term deposits with a maturity of three months or less.
(e) Financial Assets

## i. Initial Recognition \& Measurement

Financial Assets are recognized when, and only when, the Company becomes a party to the contractual provisions of the Financial Instrument. The Company determines the classification of its Financial Assets at initial recognition.
When Financial Assets are recognized initially, they are measured at Fair Value, plus, in the case of Financial Assets not at fair value through profit or loss, transaction costs that are attributable to the acquisition of the Financial Asset. Transaction costs of Financial Assets carried at Fair Value through Profit or Loss are expensed in the Statement of Profit or Loss.

## ii. Subsequent Measurement

a. Financial Assets carried at Amortized Cost (AC)
A Financial Asset is measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest income from these financial assets is measured using effective interest rate method.
b. Financial Assets at Fair Value through Other Comprehensive Income (FVTOCI)
A Financial Asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling Financial Assets and the contractual terms of the Financial Asset give rise on specified dates
to cash flows that are solely payments of principal and interest on the principal amount outstanding. These financial assets are measured at fair value and changes are taken to statement of other comprehensive income.
c. Financial Assets at Fair Value through Profit or Loss (FVTPL)
A Financial Asset which is not classified in any of the above categories are measured at FVTPL. These financial assets are measured at fair value and changes are taken to statement of profit or loss.

## iii. De-Recognition

A Financial Asset is derecognized only when the Company has transferred the rights to receive cash flows from the Financial Asset. Where the Company has transferred an Asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the Financial Asset. In such cases, the Financial Asset is derecognized. Where the Company has not transferred substantially all risks and rewards of ownership of the Financial Asset, the Financial Asset is not derecognized. Where the Company retains control of the Financial Asset, the Asset is continued to be recognized to the extent of continuing involvement in the Financial Asset.

## iv. Impairment of Financial Assets

The Company assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, there is objective evidence of impairment as a result of one or more events that has occurred since the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that a financial asset or a group of financial assets is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.
(f) Financial Liabilities

## i. Initial Recognition \& Measurement

Financial Liabilities are recognized when, and only when, the Company becomes a party to the contractual provisions of the Financial

Instrument. The Company determines the classification of its Financial Liabilities at initial recognition.
All Financial Liabilities are recognized initially at Fair Value, plus, in the case of Financial Liabilities not at fair value through profit or loss, transaction costs that are attributable to the issue of the Financial Liability.
ii. Subsequent Measurement

After initial recognition, Financial Liabilities are subsequently measured at amortized cost using the Effective Interest Method.
For trade and other payables maturing within one year from the date of Statement of Financial Position, the carrying amounts approximate Fair value due to short maturity of these instruments.
iii. De-Recognition

A Financial Liability is de-recognized when the obligation under the liability is discharged or cancelled or expires. When an existing Financial Liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the Statement of Profit or Loss.
(g) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the statement of financial position where there is legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.
(h) Reinsurance Assets

Reinsurance assets are the assets which are created against insurance contract liabilities of the amount which are recoverable from the reinsurers. These assets are created for the Reinsurer's share of Insurance Contract Liabilities.

A reinsurance asset is impaired if there is objective evidence, as a result of an event that occurred after the initial recognition of the reinsurance asset, that the Company may not receive all amounts due to it under the terms of the contract, and the event has a reliably measurable impact on the amount that the company will receive from the re-insurer. If a reinsurance asset is impaired, the company reduces the carrying amount accordingly and is recognized in statement of profit or loss.
(i) Share Capital

Financial Instruments issued by the Company are classified as Equity only to the extent that they do not meet the definition of a Financial Liability or Financial Asset.
(j) Reserves and Funds
i. Share Premium

If the Company issues share capital at premium it receives extra amount other than share capital such amount is transferred to share premium. The amount in share premium is allowed for distribution of bonus shares.

Change in reserve for unearned insurance premium represents the net portion of the net written premium transferred to the unearned premium reserve during the year to cover the unexpired period of the polices.

## ii. Outstanding claims provisions

## iii. Unapportioned surplus

Unapportioned surplus where the amount are yet to be allocated or distributed to either policyholders or shareholders by the end of the financial period, and held within the insurance contract liabilities.

## Liability adequacy

At each reporting date, the Company reviews its unexpired risk and a liability adequacy test is performed to determine whether there is any overall excess of expected claims and deferred acquisition costs over unearned premiums. The calculation uses current estimates of future contractual cash flows after taking account of the investment return expected to arise on assets relating to the relevant life insurance technical provisions. If these estimates show that the carrying amount of the unearned premiums is inadequate, the deficiency is recognized in the statement of profit or loss by setting up a provision for liability.
(I) Employee Benefits

## i. Short Term Obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the Statement of Financial Position.
ii. Post-Employment Benefits
a. Defined Contribution Plan

The contributions are accounted for as defined contribution plans and the contribution are recognized as Employee Benefit Expense when they are due.
b. Defined Benefit Plan

For Defined Benefit Plan, the cost of providing benefits is determined using the Projected Unit Credit Method, with Actuarial Valuations being carried out at each Statement of Financial Position. Actuarial Gains \& Losses are recognized in the Other Comprehensive Income in the period in which they occur. Past service cost is
recognized immediately to the extent that the benefits are already vested and otherwise is amortized on a Straight Line Basis over the average period until the benefits become vested. The retirement benefit obligation recognized in the Statement of Financial Position represents the present value of the defined benefit obligation as adjusted for unrecognized past service cost, as reduced by the Fair Value of plan Assets (If Any). Any Asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the plan.
iii. Long Term Employee Benefits

The liabilities for un-availed earned leaves are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. Leave Encashment has been computed using Actuarial Assumptions and these are measured at the present value of expected future payments to be made in respect of services provided by employees up to the end of the year using the Projected Unit Credit Method. The benefits are discounted using the market yields at the end of the year that have terms approximating to the terms of assumptions.
iv. Termination

Termination benefits are payable when employment is terminated by the Company before the normal retirement date, or when an employee accepts voluntary retirement in exchange of these benefits. The Company recognises termination benefits at the earlier of the following dates:
a. when the Company can no longer withdraw the offer of those benefits; and
b. when the entity recognises costs for a restructuring that is within the scope of NAS 37 and involves the payment of termination benefits.
The termination benefits are measured based on the number of employees expected to accept the offer in case of voluntary retirement scheme.
(m) Revenue Recognition
i. Gross Premium

Gross premiums are recognised as soon as the amount of the premiums can be reliably measured. First premium is recognised from inception date. At the end of the financial year, all due premiums are accounted for to the extent that they can be reliably measured.

## ii. Unearned Premium Reserves

Unearned premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Unearned premiums are calculated on a pro rata basis.

The proportion attributable to subsequent periods is deferred as a provision for unearned premiums.

## iii. Reinsurance Premium

Reinsurance premiums written comprise the total premiums payable for the whole cover provided by contracts entered into the period and are recognized on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period in respect of reinsurance contracts incepting in prior accounting periods. Unearned reinsurance premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date.
Reinsurance premiums and claims on the face of the statement of profit or loss have been presented as negative items within premiums and net benefits and claims, respectively, because this is consistent with how the business is managed.
iv. Fees and commission income

Commission Income shall be recognised on as soon as the income can be reliably measured. If the income is for future periods, then they are deferred and recognised over those future periods.
v. Investment income

Interest income is recognised in the statement of profit or loss as it accrues and is calculated by using the Effective Interest Rate (EIR) method. Fees and commissions that are an integral part of the effective yield of the financial asset are recognised as an adjustment to the EIR of the instrument.
Investment income also includes dividends when the right to receive payment is established.

## vi. Net realised gains and losses

Net realised gains and losses recorded in the statement of profit or loss include gains and losses on financial assets and properties. (n) Benefit, Claims and Expenses

## i. Gross Benefits and Claims

Benefits and claims includes the cost of all claims arising during the year, including external claims handling costs that are directly related to processing and settlements of claims. of receipt of intimation of death of the assured or occurrence of contingency covered.

## ii. Reinsurance Claims

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contracts.
(o) Product Classification

Insurance contracts can also transfer financial risk.
The Company has following portfolios under which it operates its business:

The Finance Charge is allocated to periods during the Lease Term at a constant periodic Rate of Interest on the remaining balance of the liability.

## Operating Lease

Leases in which the Company doesn't have substantial portion of the risks and rewards of ownership are classified as Operating Leases. The

(s) Income Taxes

Income Tax Expense represents the sum of the tax currently payable \& Deferred Tax.

## i. Current Tax

ii. Deferred Tax

Deferred Tax Assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible Temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized.
Deferred Tax Liabilities are generally recognized for all taxable Temporary differences.
The carrying amount of Deferred Tax Assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the Deferred Tax Asset to be utilized.
(t) Provisions, Contingent Liabilities \& Contingent Assets

## i. Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, for which it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made.
Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate to
determine the present value is a Pre-Tax Rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.
Provisions for Contingent Liability are recognized in the books as a matter of abundant precaution and conservative approach based on management's best estimate. However, Management believes that chances of these matters going against the company are remote and there will not be any probable cash outflow.
ii. Contingent Liabilities

Contingent liabilities are recognized only when there is a possible obligation arising from past events due to occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.
iii. Contingent Assets

Contingent assets where it is probable that future economic benefits will flow to the Company are not recognized but disclosed in the Financial Statements.

## Valuation Method and Assumptions

The amount of long-term liabilities has been determined prospectively at a policy level, on a seriatim basis, using a Gross Premium Valuation methodology as specified by Actuarial Valuation Directive 2076 for Life Insurance Business. The reserves are computed on excel sheets using VB by projecting the cash-flows at monthly intervals till the end of the policy term for each policy.

## Reserves for Participating and Non- Participating Business

Reserves are computed using gross premium methodology. The amounts of long-term liabilities have been determined separately for each contract using a prospective calculation by projecting future cash flows. Hence the reserves are value of benefits plus value of future expenses after allowing for expense inflation less value of office premium, all computed at a policy level.
The various policy benefits considered include Death Benefit, Survival Benefit, Maturity Benefit and Surrenders. Cash flows are projected in accordance with the product specifications for each plan.
Future commission and other remuneration payable to the distributers as well as future management expenses to be incurred are part of the cash outflows.
$23^{\text {st }}$ ANNUAL REPORT 2078/79
Life Insurance (Oorporation (Nepal) Ltd.
For participating products, accrued and vested bonus as at date of valuation and assumption for future bonus is incorporated into the computation and projection of the benefit cash flows - death and maturity benefits. The level of future bonuses reflects the reasonable expectation of the policyholders; also takes into consideration the asset share, likely future experience, bonus earning capacity of New Policies as well as the sustainability of future bonus levels (having regard to the already allocated bonuses) for existing policies.
Savings policies acquiring paid-up status are treated as single premium endowment policies with reduced sum assured and vested bonus, if any. In case of protection policies acquiring paid-up status, cash-flows related to protection benefits based on reduced sum assured are projected along with policy expenses.
The credit of reinsurance is considered in the computation of reserves by allowing cash flows pertaining to reinsurance at policy level. Reinsurance premiums are considered as outgo and recovery from reinsurer on expected reinsurance claims are considered as income while calculating the reserve for each policy. The reserves, gross and net of reinsurance are computed, and the reserve net of reinsurance is considered for the purpose of reporting.
When the amount of mathematical reserve on a policy is negative, a provision equal to the negative reserve is kept as 'negative reserve' so that the total reserve is floored at zero.
The liability, so obtained for each policy, is floored to the surrender value payable at the of valuation.

## Options and guarantee available for Individual and Group Business

There are no explicit options and guarantees in the products.
For products with guaranteed additions, the guaranteed additions vested as on payment date (death or maturity) have been considered as part of liability. Future guaranteed benefits are modelled to be payable when they vest.

## Reserves for Optional Riders

Reserves are held for riders such as Accident Cover, Waiver of Premium and Term Cover.
For all the riders, higher of a gross premium valuation or provision equivalent to Unearned Premium Reserve method on a $1 / 365$ basis is held.

## Provision for Revival of Lapsed Policies

The Gross Premium Valuation methodology is used to compute mathematical reserve for all lapsed policies (that have not acquired paid-up value). The methodology used is the same as that used for in-force policies i.e., the cash-flows are projected by assuming that the policies are in-force.
A provision is held towards the liability that may arise from the policies that may revive in the future. As per circular 04/070/71 No. 2543 dated 2070/09/25, issued by Beema Samiti, lapsed policies can be revived at any time irrespective of when the policy had lapsed. Therefore, the provision is held towards all the lapsed policies within the policy term.
The provision equal to $7.5 \%$ of the reserve is held after allowing for the premium receivable on revival, based on the expected revival rate of the Company. A revival rate of $1 \%$ was observed in the year 2019-20 and 3.96\% in 2020-21 (on SA basis). The revival experience may change each year depending on the management actions to improve the persistency. The Company shall monitor the revival experience on a regular basis and inform of any change to such experience. The assumption may be reviewed subsequently.

## EMR Provision

There is an additional mortality risk in respect of policies which are rated up on account of occupation hazard, over/underweight, smoking history, previous/current health condition or geographical conditions. Extra premiums are charged for the higher mortality/morbidity risks on such policies. The rated-up premium is used for valuing the future premium receivable.
It is assumed that prudence in the mortality basis would provide for the additional death outgo on account of this. However, the unearned premium reserve on the extra premium received is held as a provision towards extra mortality reserve.

## Global Reserve

As per best practices, a global provision has been held towards meeting claims arising as a result of any catastrophic event and operational risk to cover any unforeseen events and issues. As per Quantitative Impact Studies (QIS) - 5 Technical Specifications issued by the Committee of European Insurance and Occupational Pension Supervisor stipulates the Catastrophe Risk Charge towards mortality and morbidity to be 1.5 Mille per Sum at Risk. The same has been considered for the computation and is appropriately adjusted in consideration with the existing Catastrophe treaty. Further, the capital requirement for operation risk is considered as $1 \%$ of total liability which seems consistent with Internationally followed best practices.
A provision for excess Covid-19 deaths is also provided in the valuation reserve.

## Cost of Bonus

A provision has been held to support the cost of bonus declared as at the date of valuation.

## Tax

Tax is charged on the company @ $25 \%$ of Income less expenses (I-E). The future tax outgo could be provided for implicitly by taking a margin off the valuation rate of interest after taking credit for expense credit. A crude assessment suggests that this would be equivalent to 50 bps of margin, considering carry forward of unused expense credit. Considering that the valuation rate of interest is prescribed by the Valuation Directive 2020, and the yield on the Life Fund based on which the valuation rate of interest is assessed is calculated net of tax, it is presumed that this margin is subsumed within this rate of interest and no separate provision is made.

## Reserves for One Year Renewable Group Term Business (Plans 801 /851)

For the one-year renewable group term products, Unearned Premium Reserve (UPR) method using $1 / 365$ th method has been used for valuing liabilities.

## Smoothing Reserves

A provision has been held for smoothening of future bonuses to be declared to policyholders.

## Valuation Assumptions

The Valuation Directive 2020 stipulates that the determination of the amount of liability under each policy shall be based on prudent assumptions of all relevant parameters. The assumptions used in the GPV basis are realistic (best estimates) as emerging out of various experience analysis where credible data is available, plus a margin for adverse deviation. The following assumptions have been made in the valuation conducted as on 15th July 2020:

| Valuation Assumption | As on 16th July 2022 | As on 15th July 2021 |
| :--- | :--- | :--- |
| Mortality | $100 \%$ of NALM 2009 Table | 100\% of NALM 2009 Table |
| Rate of interest | $6 \%$ per annum | 6\% per annum |
| Expenses/Commissions | As actual | As actual |

| Valuation Assumption 2021/22-Expenses | Best Estimate | MAD | Valuation Basis |
| :--- | :---: | :---: | :---: |
| Renewal Premium Related | $0.58 \%$ | $20 \%$ | $0.70 \%$ |
| Renewal Per Policy |  |  |  |
| Individual Term | 158 | $20 \%$ | 190 |
| Group Term | 53 | $20 \%$ | 64 |
| Individual Savings | 252 | $20 \%$ | 302 |

| Bima Samiti Service Charge- All Premiums |  |  |  |
|  |  |  | $3.50 \%$ |
| Expense Inflation |  |  |  |

*** All initial expenses except for the Bima Samiti Charge would apply as point Zero cost.

## Bonus Related Assumptions

A detailed account of the rationale for the current and future bonus assumptions and the considerations around this are stated in Section 10 and 12 of actuary report.

## 45. Insurance Risk

Insurance risk includes the risk of incurring higher claims costs than expected owing to the random nature of claims, frequency and severity and the risk of change in the legal or economic conditions of insurance or reinsurance cover. This may result in the insurer having either received too little premium for the risks it has agreed to underwrite and hence has not enough funds to invest and pay claims, or that claims are in excess of those expected.
The Company seeks to minimise insurance risk through a formalised reinsurance arrangement with an appropriate mix and spread of business between classes of business based on its overall strategy. This is complemented by observing formalised risk management policies.
The Company considers insurance risk to be a combination of the following components of risks:
a. Product development
b. Pricing
c. Underwriting and
d. Claims Handling
e. Reinsurance
f. Reserving

## a. Product development

The Company principally issues the following types of Life Insurance contracts:

- Endowment
- Anticipated Endowment
- Endowment Cum Whole Life
- Whole Life
- Foreign Employment Term
- Other Term
- Special Term
- Others (to be Specified)

The above risk exposure is mitigated by the diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is improved by careful selection and implementation of underwriting strategies, which are designed to ensure that risks are diversified in terms of type of risk and level of insured benefits.
Furthermore, strict claim review policies to assess all new and ongoing claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims are put in place to reduce the risk exposure of the Company. The Company further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the business.

## b. Pricing

The pricing of an insurance product involves the estimation of claims, operational and financing costs and the income arising from investing the premium received. The pricing process typically comprises collecting data on the underlying risks to be covered, determining the pricing assumptions and the base rate, setting the final premium rate, and monitoring the review of the appropriateness of pricing.
The Company collects adequate data to validate the reasonableness of the underlying assumptions used for pricing. The base rate represents the amount required to meet the value of anticipated benefits, expenses, and margins for risks and profit. Data primarily relates to the company's own historical experience and that of the industry where relevant. These may be supplemented by other internal and external data, and could include trends observed in claims costs and expenses.
Pricing is done by modelling all identified risks, using appropriate methodologies depending on the complexity of the risks and available data. Adequate buffers are kept in the premiums to cushion against the risk that actual experience may turn out to be worse than expected.

## c Underwriting

The Company's underwriting process is governed by the by the internal underwriting procedures. Some of the actions undertaken to mitigate underwriting risks are detailed below:
i. Investments are made on the training and development of underwriting and claims management staff, including those attached to the distribution network.
ii. Application of Four-Eye principle on underwriting process.
iii. Pre-underwriting inspections are made on new business over a predetermined threshold to evaluate risk prior to acceptance.

21t ANNUAL REPORT 2078/79
Life Jnsurance (Corporation (Nepal) Etd.
iv. Post-underwriting reviews are conducted to ensure that set guidelines have been observed.
v. Adequate reinsurance arrangements are in place and reviews are undertaken to ensure the adequacy of these covers.
d. Claims handling

The Company considers insurance claim risk to be a combination of the following components of risks:
i. Mortality Risk - risk of loss arising due to policyholder death experience being different than expected
ii. Longevity Risk - risk of loss arising due to the annuitant living longer than expected
iii. Investment Return Risk - risk of loss arising from actual returns being different than expected
iv. Expense Risk - risk of loss arising from expense experience being different than expected
v. Policyholder Decision Risk - risk of loss arising due to policyholder experiences (lapses and surrenders) being different than expected

## Assumptions

The assumptions that have the greatest effect on the statement of financial position and statement of profit or loss of the Company are listed below:

| Particulars | Current Year |  |  |  | Previous Year |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Sensitivities

The life insurance claim liabilities are sensitive to the key assumptions as mentioned in the table below.
The following analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, profit before tax and profit after tax. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis.

| Discount Rate | -1\% | - | 88,482,404 | - | - |  | 5,081,123.95 |  | - |

## e. Reinsurance

The Company purchases reinsurance as part of its risks mitigation programme. Premium ceded to the reinsurers is in accordance with the terms of the programmes already agreed based on the risks written by the insurance companies. Recoveries from reinsurers on claims are based on the cession made in respect of each risk and is estimated in a manner consistent with the outstanding claims provisions made for the loss. Although we mitigate our exposures through prudent reinsurance arrangements, the obligation to meet claims emanating from policy holders rests with the Company. Default of reinsurers does not negate this obligation and in that respect the Company carries a credit risk up to the extent ceded to each reinsurer.

## f. Reserving

Insurance Contract Liabilities are created to cover this risk based on the actuarial valuation report.
The table below sets out the concentration of risk associated with above mentioned products. Risk as at year end has been measured as insurance contract liabilities and disclosed as below:

## 46. Fair Value Measurements

a. Financial Instruments by Category \& Hierarchy

This section explains the judgements and estimates made in determining the Fair Values of the Financial Instruments that are (a) recognised and measured at fair value and (b) measured at Amortised Cost and for which Fair Values are disclosed in the Financial Statements.
To provide an indication about the reliability of the inputs used in determining Fair Value, the Company has classified its financial instruments into Three Levels prescribed as per applicable NFRS.

| Total Financial Liabilities |  | - | - | 1,261,774,178 | - | - | 1,664,469,096 |

Level 1: Level 1 Hierarchy includes Financial Instruments measured using Quoted Prices.
Level 2: Fair Value of Financial Instruments that are not traded in an active market is determined using valuation techniques which maximises the use of observable market data and rely as little as possible on entity-specific estimates.

If all significant inputs required to determine Fair Value of an instrument are observable, the instrument is included in Level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

There is no transfer of Financial Instruments between different levels as mentioned above during the year.
b. Valuation Technique Used to Determine Fair Value
i. Use of quoted market prices or dealer quotes for similar instruments
ii. Fair Value of remaining financial instruments is determined using discounted cash flow analysis
c. Valuation Process

The finance and accounts department of the Company performs the valuation of financial assets and liabilities required for financial reporting purposes. Discussion on valuation processes and results are held at least once in a year.
The main level 3 inputs are derived and evaluated as follows:
i. Discount rate is arrived at considering the internal and external factors.
ii. Discounting has been applied where assets and liabilities are non-current, and the impact of the discounting is material.
d. Fair Value of Financial Assets and Liabilities Measured at Amortised Cost

## 47. Financial Risk Management

The Company's activities expose it to Credit Risk, Liquidity Risk \& Market Risk.
a. Credit Risk

Credit risk is the risk of financial loss as a result of the default or failure of third parties to meet their payment obligations to the Company. Thus, for an insurance contract, credit risk includes the risk that an insurer incurs a financial loss because a reinsurer defaults on its obligations under the reinsurance contract.
The following policies and procedures are in place to mitigate the Company's exposure to credit risk:
i. Company has credit risk policy which sets out the assessment and determination of what constitutes credit risk for the Company. Compliance with the policy is monitored and exposures and breaches are reported to the Company's risk committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.
ii. Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by entering into agreement with more than one party. At each reporting date, management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy, ascertaining suitable allowance for impairment.
iii. The company deals with only creditworthy counterparties and obtains sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults.
